

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

INTRODUCTION.

THERE has, for some years, been a growing interest in genealogical research, and the literature on the subject is already very extensive, although it is, for the most part, shut up in the archives of historical libraries, and the public are ignorant of its existence.

The perusal of elaborate and intricate tracings of genealogical branches is not a popular study, for it is impossible to create a very widespread interest in names the record and recollection of which have passed away in the current of time ; but it is not so with the *direct pedigrees* of those whose living personality is part of our social or national life.

"Who is he?" is almost the first question put regarding an individual who happens to come into prominence or notoriety, and the absence of trustworthy information on the subject of ancestry often gives rise to very serious misapprehension. However indifferent some may affect to be regarding this question of ancestry, universal experience of human nature serves to prove that those who really have a pedigree will usually boast of it, whilst only those who lack one, and cannot perhaps even trace to their grandfather, will condemn such as frivolous and foolish. Some of America's greatest citizens have not hesitated to declare their pride of birth and pedigree. PRESIDENT GARFIELD delighted to dwell on the traits of his ancestors and was justly proud of his long lineage; SAMUEL J. TILDEN found leisure amidst the strife of politics to devote to such investigations; and DANIEL WEBSTER often declared that the study of ancestry was an incumbent duty, and that we should look upon the present generation as connecting links between the eventful past and the unknown future. The preservation of pedigrees is therefore not the mere pastime of the idle or curious. It is the honorable employment of the student and of the historian. *It has always formed the basis of all true history.*

In the ancient records of Assyria, Egypt, and Arabia, the pedigree of an individual was usually the thread upon which was strung the stirring events of

centuries, and so important a place did the preservation of a lineage occupy amongst the Jewish people that it was established as a positive obligation upon every Levite of the temple.

Nor was this genealogical form of history peculiar to Semetic races. The earliest Greek records were also those of pedigrees. The histories of Acusilaus of Argos, and of Hecataeus of Miletus were entitled *γενεαλογίαι* (genealogies), and the fragmentary histories of Xanthus, Charon of Lampsacus, and Hellanicus are strongly marked with the genealogical element, a form of history which is clearly sustained in the Greek Testament by the writers of the gospel narrative, who base the whole structure of Christianity upon the established pedigree of its founder.

Josephus regarded genealogical study as of the utmost importance, and in giving an account of his personal history, boasts "I have traced my pedigree as I have found it recorded in the public tablets." And it is in harmony with such feelings that the present work on AMERICAN ANCESTRY has been undertaken.

The names of only those who can trace their lineage to an ancestor who was settled in America previous to the DECLARATION OF AMERICAN INDEPENDENCE are admitted, and when it is remembered that there was only a population of less than two millions and a quarter in the whole of the United States in the year 1776 (exclusive of slaves and Indians), it will be seen that but a small proportion of the present population can claim the honor of being descended from the original American stock; and consequently in ages to come, the arrival of the Virginian colonists, the emigration of the Puritan and Dutch settlers, as well as the settlement of the Quaker and Huguenot refugees will form as memorable epochs in the history of the GREAT REPUBLIC as the Saxon and Norman conquests of GREAT BRITAIN now do in the history of that country. A few centuries hence Americans will experience as much pleasure in tracing back their ancestry to those periods as the English now do to the days of William the Conqueror.

These volumes of AMERICAN ANCESTRY will supply a most convenient method of preserving such pedigrees. And although its pages will contain, for the most part, but simple records of uneventful generations, they will preserve facts which would otherwise be lost in the history of the people.

The number of lineages in the present volume, embracing ALBANY CITY, is comparatively small. But a very large majority of the residents of Albany, who have every reason to believe that they are descended from an old American stock, cannot trace as far back as 1776, whilst not a few of those who bear the

well-known names of early Dutch and English settlers have an awkward and inconvenient *hiatus* in their pedigrees, to which history cannot supply the necessary link.

In a few instances the lineages of prominent Albanians have been withdrawn, because the design of our work precludes the publication of *auto-biographical sketches* (not always of the most modest and unassuming character) of living persons. As our work is exclusively one on *Ancestry*, we have found it wiser and safer to omit all references to the living beyond the names and marriage.

Each lineage is intended to be an impartial record, and we have been careful to expunge all such adjectives as "great," "prominent" and "pious" from the pedigrees. The historic record of public offices held, works written, and other remarks pretty clearly define the position of each line of ancestry without any laudatory statements.

We have been anxious to obtain all the information possible regarding the history of a family prior to emigration, and when a distinct pedigree is given to a noble or distinguished ancestry, we have been careful to insert it, but in those cases where the line is at present only *probable* we have given a qualified statement to that effect, for as the *ipsissima verba* of the manuscript sent to the editor have in no case been inserted, he practically makes himself responsible for the lineages.

Undoubtedly some of the very best blood of the old world flowed in the veins of the early American colonists, and the more carefully their genealogy is investigated, the more deeply interesting will be the facts elucidated, and we cannot but hope that the publication of successive volumes of AMERICAN ANCESTRY will both stimulate inquiry as to the early history of American families and also revive that most ancient method of forming history — the careful and painstaking study of genealogy and pedigree.

[505]

———— **FRANS JANSEN PRUYN** or **PRUEN** (as the name is written presumably by himself) (the ancestor of 501, 502, 503, 504, 505), who was the son of John Pruyn of Holland, is found settled in Albany with his wife, Aeltje or Alida, as early as 1665. Being a Roman Catholic he refused to take the oath of allegiance to King William, the Protestant king of England, but expressed himself willing to swear fidelity. His son John, however, subscribed to the oath. His widow, Aeltje, joined the Dutch Reformed Church in 1683. (See *Pruyn Gen.* by John V. L. Pruyn, Jr., 1886.) This family has been resident and has held positions of trust in the city of Albany during its six generations. There are traces of the name in Holland as far back as 1333, and of a similar name in France as far back as 800.

————— **HENRY TOWNSEND** (m. Anne Coles), ancestor of 645, 646, 647, 648, with his two brothers, John and Rich-

ard, came from Norwich, Norfolk, England, and landed probably at Lynn, Mass., and then came to Long Island, and settled at Flushing; his brother John being one of the original settlers of that place, to whom the patent was granted by Gov. Kieft, in 1645. On account of political and religious difficulties with the Dutch governor, Peter Stuyvesant, the Townsend brothers removed to Warwick, Rhode Island, where they were all three members of the provincial assembly, and held, besides, municipal offices. In 1656 they once more attempted to settle in Long Island, and in that year obtained, with others, the patent of *Rustdorp* (now Jamaica). In 1657 Henry Townsend was arrested, imprisoned and fined "one hundred pounds Flanders" for harboring Quakers in his house. In the following year, 1658, he moved with his brothers to Oyster Bay, which was out of the jurisdiction of the Dutch hierarchy at New Amsterdam, where he spent the remainder of his life, and died at Oyster Bay, in 1695. This family is probably connected with the distinguished family of the Townsends of Raynham, Norfolk, England, and of Sir Roger Townsend of Ludlow Salop, but the link is not established. INTRODUCTION.

Columbia county, in the State of New York, lies on the east bank of the Hudson river, between Dutchess county on the south and Rensselaer county on the north, and extends to the boundary line of the State of Massachusetts. It is about thirty-six miles in length and about twenty miles in breadth, with an area of 688 square miles, and a population of 47,928. Its capital city is Hudson, and its minor divisions or townships are Ancram, Austerlitz, Canaan, Chatham, Claverack,* Clermont, Copake, Gallatin, Germantown, Ghent, Greenport, Hillsdale, Kinderhook,† Livingston, New Lebanon, Stockport, Stuyvesant‡ and Taghkanick.§

The earliest mention of this tract of country is found in a monograph by Henry Hudson, the discoverer, when on the evening of September 17, 1609, he anchored opposite the spot now occupied by the county seat which bears his name. In ancient days it was sparsely inhabited by Indian tribes residing on the bank of the Hudson and in the Taghkanick hills.

The first European settlers of the county seem to arrange themselves in four groups: the Dutch settlers from Albany, the tenants of the Livingston Manor, the settlement of German palatinates, and the gradual immigration of New England families.

Under the Dutch government, and the directors of its West India Company, a large number of Holland families settled in what are now known as the townships of Kinderhook, Ghent, Stuyvesant, Stockport and Claverack, the latter being the seat of the Van Rensselaers, as patroons of the lower manor, which comprised not less than 170,000 acres of land. The

earliest records are those of the Dutch Reformed Church, which establish the fact that very many well-known county names were among its earliest settlers, and are still represented by numerous descendants. The Van Rensselaers, for example, in two direct lines from the founder of that historic family in America.

The Livingston Manor originally contained upwards of 160,000 acres, and included a large portion of the present townships of Livingston, Clermont, Copake, Ancram, Gallatin, Germantown and Taghkanick, being granted by a patent issued by Governor Dongan to Robert Livingston in 1685, and confirmed by royal charter in 1715. Descendants of this distinguished family still reside within the limits of the county, although the old manor house at Clermont, and nearly all the estate, have passed from possession of the descendants of the first Lord of the Manor. Robert Livingston, although a Scotchman by birth, does not seem to have introduced to America many of his own countrymen. A refugee in Holland, he appears to have come to this country with strong Dutch proclivities, and his intimate connections with the Van Rensselaers gave a distinctively Dutch character to the Livingston colony.

In the year 1710, Queen Anne, through Governor Robert Hunter, purchased from Robert Livingston 6,000 acres of land on the Livingston Manor for the settlement of German palatinates who had served in the British army, and formed the original settlement of what is now known as Germantown. Some of the first settlers removed to the Mohawk and Schoharie valleys, but the descendants of not a few are still residing in the township.

The township of Canaan, which was afterward divided into New Lebanon and parts of Chatham and Austerlitz, was first occupied by emigrants from New England, Samuel A. Curtis being the first white child born in the place; but the great influx of American settlers took place after the declaration of Independence in 1776; and the unsettled condition of affairs previous to that epoch is evident from the fact that a very large number of the lineages in this volume can only be traced to the revolutionary period, family records having been lost when the members thereof were engaged in a great national struggle, and the whole country was in a state of turmoil and transition.

The object of the present undertaking is to preserve in the deluge of time the pedigrees and salient historic incidents in a family, and to present them in the popular form of a direct pedigree. For many years there has

been a growing interest in genealogical research, as the very large collections of such works in our leading libraries testify; but they are very often diffuse in their character, and not of great importance to the general public, whereas the pedigrees of those whose living personality is part of our social and national life are of more interest.

The preservation of pedigrees is not the mere pastime of the idle and curious, it is the honorable employment of the student and historian, for it has always formed the basis of true history. In the ancient records of Assyria, Egypt and Arabia, the pedigree of an individual is usually the thread upon which is strung the stirring events of centuries, and so important a place did the preservation of a pedigree occupy among the Israelites that it was established as a positive obligation upon every Levite in the Temple. Josephus regarded genealogical study as of the utmost importance, and in giving an account of his personal history, boasts "I have traced my pedigree as I found it recorded on the public tablets." Nor is the genealogical form of history peculiar to semetic races. The earliest Greek records were also those of pedigrees. The histories of Acusilaus of Argos, and of Hectæus of Miletus were entitled genealogies (*γενεαλογίαι*), and the fragmentary histories of Xanthus, Charon of Lampsacus and Hellanicus are strongly marked with the genealogical element, whilst in the Greek Testament the whole structure of Christianity is based upon the established pedigree of its founder.

It is true that in the volume before us there are many lineages which contain nothing save the simple records of uneventful generations, but they preserve facts which would otherwise be lost in the history of the American nation. Examples illustrative of this are seen in a comparison of two lineages of historic value as regards Columbia county history — that of Martin Van Buren, eighth president of the United States, who was born at Kinderhook in 1782, and that of Samuel J. Tilden, governor of New York State and candidate for the presidency in the great political struggle of 1876, and who was born in New Lebanon. The records of the Van Buren family have not been preserved, and we have, therefore, no information regarding the pedigree of Martin Van Buren beyond that of his father, although he was undoubtedly descended from an old Dutch ancestry — whereas in the case of Samuel J. Tilden we are able to trace the lineage of one who is an important figure in American history to the original English stock. Some affect to be indifferent to such matters, on the principle that we judge of a man as we find him, and not on the merits of his ancestors,

but such feelings are not in harmony with those of the student of history and of hereditary genius.

The publication of such details as are given in the present volume have also another aspect of importance, inasmuch as they may enable families to trace their ancestry to a remote period. Such works as Savage's *Genealogical Dictionary of New England*,* Austin's *Dictionary of Rhode Island*,† Munsell's *First Settlers of Albany*, and the long list of works given in Durrie's *Alphabetical Index to American Genealogies and Pedigrees*,‡ trace as far as possible the three first generations of early American immigrants, and all that is needed is a careful investigation regarding the two generations which usually connect the present with the past as recorded in those genealogical publications.

Such a work as the present must also be of some interest and importance to many persons in Europe, as enabling them to locate branches of their families who have obtained a "local habitation and a name" in the new world.

—— **FRANS JANSEN PRUYN** or **PRUEN** (as the name is written presumably by himself) (the ancestor of 1028, 1029, 1030), who was the son of John Pruyn of Holland, is found settled in Albany with his wife, Aeltje or Alida, as early as 1665. Being a Roman Catholic, he refused to take the

oath of allegiance to King William, the Protestant king of England, but expressed himself willing to swear fidelity. His son John, however, subscribed to the oath. His widow, Aeltje, joined the Dutch Reformed Church in 1683. He had sons Johannes, Samuel, Frans and Arent. Samuel was the founder of the Albany branch of Pruyns, which has held positions of trust in that city, and Arent migrated to Kinderhook, where his descendants have also resided for six generations. There are traces of the name in Holland as far back as 1333. See *Pruyn Gen.* by John V. L. Pruyn, Jr., 1886; Munsell's *Collections*.

[1046]

"The hasty Coffin—fractious loud
The silent Gardiner—plotting,
The Mitchells good, the Barkers—proud.
The Macys eat the pudding,
The Rays and Russells coopers are
The knowing Folgers lazy—
A learned Coleman very rare
And scarce an honest Hussey."

Vol. II. Columbia County.

American Genealogical Index, being an alphabetical index to American Genealogies and Pedigrees contained in State, County and Town Histories, Printed Genealogies and kindred works, by Daniel S. Durrie, Librarian State Historical Society of Wisconsin. Third edition, revised and enlarged (last edition), Albany, 1886, 8vo, about 245 pages, cloth, \$3.

This work has been prepared with a view to facilitate the study of family history, by furnishing an index to the genealogies contained in the large number of county and town histories, collections of public and privately printed genealogies, centennial anniversary celebrations, biographies and other works containing the desired information. But few persons have an adequate knowledge of the amount of genealogical material to be found in such volumes, from the fact, that any thing like a full collection of works in those departments can only be found in the larger cities, and in the hands of a few private parties; and without consulting them, it is often an impossibility to prepare a family history, or of learning any thing very definite of any particular family. With the assistance furnished by this volume, no difficulty will be experienced in collecting needed information, by any one interested in such investigations. It also affords instruction to the general reader who may not know whether the history of his native county, town or village has ever been written and published; but its most desirable feature is the knowledge to be gained by all persons, whether residing in the country or elsewhere, who, by examining its pages, can inform themselves whether the genealogy or pedigree of any family, or any portion thereof, in which they may feel an interest, has been printed in any volume, and if so, that they may have the benefit of such information. More than fifteen thousand names are here alphabetically arranged. Several hundred volumes of historical and biographical publications have been minutely examined in detail, and not depending on the indexes, appended to such volumes, which are more or less defective and incomplete. A number of works not accessible to the compiler have been examined by parties interested in perfecting the work. The more important names in Dr. Savage's *Genealogical Dictionary* have been noticed as well as the genealogies found in the volumes of the *New England Historical and Genealogical Register*. This is the only work of the kind published in this country. It has been the aim of the compiler to make it as thorough and complete as possible. The body of the work is preceded by a list of principal titles of works referred to in the index.
